MD Sabbir Hasan

Software Engineer

sabbirhasananik@gmail.com / +880 1774 309434 / Dhaka, Bangladesh / github.com/anik-ewu / LinkedIn / Codeforces

Backend-focused software engineer with 5+ years building and operating enterprise .NET services for Swiss insurers — distributed REST APIs, CQRS and event-driven architecture delivered on Azure, with production on-call ownership. Competitive programmer, 2000+ problems solved and three ACM ICPC regionals.

Experience

SELISE Digital Platforms — *Software Engineer*

May 2021 – Present · Dhaka, BD

- Built scalable backend services and RESTful APIs in **C#/.NET** for enterprise insurance platforms, applying **CQRS**, event-driven architecture and **Domain-Driven Design** across distributed services.
- Core engineer on **EcoHub**, an insurance platform used by top Swiss insurers — owned backend service design and led the Angular client integrating it.
- Authored technical design documents and iterated with UI/UX and the client to validate the approach before implementation.
- Covered features with **unit tests** and an in-house automated test suite, pairing with QA on high-risk flows ahead of release.
- Held **on-call** responsibility for Swiss client deployments, diagnosing production incidents with **Application Insights** and **Seq** structured logs.
- Automated cross-system data synchronization with **Azure Functions** and a HubSpot CRM integration.
- Cut build and deploy time by **50%** by isolating translation delivery into its own pipeline (ngx-translate, POEditor).
- Mentored 3 junior engineers, owned code review and merge quality, and ran sprint-based releases on **Azure DevOps**.

Projects

OpenDXP github.com/anik-ewu/open-dxp-project

.NET 8 · Angular 20 · PostgreSQL · Redis · Kafka · pgvector · Docker · Kubernetes · Azure

- Headless CMS and digital experience platform on Clean Architecture with CQRS (MediatR): draft→publish versioning, REST delivery API, and **OpenIddict** OIDC auth (auth code + PKCE, refresh-token rotation, RBAC and resource-based policies).
- Kafka **transactional outbox** fans one *PagePublished* event out to five independent consumers — cache invalidation, search re-indexing, audit trail, experiment analytics and auto-tagging.
- Audience targeting with SHA-256 visitor bucketing for A/B splits, pgvector related-page search and a Helm chart verified end to end on a live cluster.

FlagMaster github.com/anik-ewu/feature-flag

.NET 8 · Angular · PostgreSQL · Redis

- Multi-tenant feature-flag platform with percentage rollouts and targeting rules; evaluation API optimized with Redis caching on Clean Architecture and CQRS.

Skills

Languages	C# · TypeScript · C++ · JavaScript · SQL
Backend	.NET / ASP.NET Core · MediatR (CQRS) · REST · Kafka · Clean Architecture · Domain-Driven Design
Frontend	Angular · HTML · CSS
Data	PostgreSQL · EF Core · Redis · Cosmos DB · MongoDB · MySQL
Platform	Azure (Functions, DevOps, Blob Storage) · Docker · Kubernetes · GitHub Actions · Git
Quality & Ops	Unit testing · Application Insights · Seq · Agile / Scrum

Education & Certification

East West University — *B.Sc. in Computer Science and Engineering*

May 2016 – Feb 2021 · Dhaka, BD

Microsoft Certified: **Azure Fundamentals (AZ-900)**, July 2025.

Competitive Programming

- 2000+ problems solved across Codeforces, UVa and other online judges; official tester, Codeforces Round 886.
- **Top 19 / 150 teams**, National Collegiate Programming Contest 2020.
- ACM ICPC Dhaka Regional 2018, 2019, 2020; NCPC 2018; 15+ inter-university contests.
- 1st place, Intra University Telco Code War 2019; top 5 / 50 teams, UITS Inter-University 2019.

Community

Taught 150+ volunteer programming classes and organized the EWU intra-university programming contests in 2022 and 2023.
